

MANAGEMENT ANALYST

City of Hesperia

\$6,893 - \$8,402

Check out the City's Website for Benefit Information!

The Management Analyst is an integral member of the City's team who will provide advanced level analytical support to the City Manager's Office and other City departments, including management of emergency preparedness, environmental and grant programs, franchise agreements, and will conduct policy analysis and development from inception through implementation related to City Council priorities. This position will remain current on proposed federal, state, and local legislative initiatives on emergency preparedness, environmental and other assigned community related programs. Will be responsible for tracking, analyzing, and making recommendations for engagement regarding proposed legislation, grant opportunities and other highly visible projects impacting the City.

Three (3) to four (4) years of considerable experience in government (preferably local government) performing a wide variety of professional level analytical activities.

Bachelor's degree from an accredited college or university in public administration, business administration, or a related field and some responsible experience conducting research and analysis; and a High School diploma or GED; A master's degree (or work in progress) is highly desirable.
