Available special pays including longevity and 457 contribution

Great work environment with generous leave benefits

Excellent cafeteria-style benefits with monthly contribution up to \$2,150 for family coverage, available voluntary life insurance, and City-paid life insurance and EAP.

The City of Redondo Beach seeks a Waterfront Manager to help oversee the City-owned harbor area. The City's Harbor and Pier area occupies over 150-acres of land and water and is comprised of a combination of publicly accessible open space and private commercial businesses that operate on publicly owned land through leases. The position will be tasked with providing real estate and financial advisory services for City-owned asset management, as well as lead pivotal new construction projects that will revitalize and enhance the various public amenities within the waterfront. Revitalization of the waterfront has been a key strategic priority for the City for many years. In 2022, the City Council approved a new vision called the "King Harbor Public Amenities Plan", inclusive of over 40 projects meant to upgrade the recreational and operational needs within the waterfront. Examples of projects listed in the new vision include a new public boat launch, a revitalized Seaside Lagoon, an upgraded pedestrian walkway, and various projects to address sea level rise. The projects will serve as a system within which other revitalization efforts can occur, including attraction of private investment and improving the recreational, educational, and entertainment offerings available to residents and visitors. The Manager will report directly to the Waterfront Director with six direct reports, including two City employees and four contract employees. This role requires a problem solver who is adept at effectively working with Redondo Beach stakeholders and other departmental leaders. Become a key player in our mission-driven and dynamic City – apply today!

Required Education and Experience: A bachelor's degree in public or business administration, finance, engineering, real estate management, urban planning or a closely related field and five (5) years of progressively responsible experience with local, county, state, and/or federal government work experience performing similar duties. Two (2) years of supervisory experience with local, county, state and/or federal government is required.

Highly Desirable Qualifications: Education, experience, training, and/or certifications related to Project/Construction/Program Management, Engineering, Urban Planning, California Environmental Quality Act (CEQA), and/or the California Coastal Act. Experience with coastal/harbor related projects, operations and maintenance, marketing/promotion, event execution, and management; CEQA processes and documents; and Coastal Act compliance, Local Coastal Program compliance, and tidelands and coastal zone entitlement processes. Experience with Harbor Patrol, Lifeguard, and other coastal/water-related public safety operations and regulation compliance. Fluency in speaking, reading and understanding Spanish.
