

MANAGEMENT ANALYST II IREN

San Bernardino County Transportation Authority

\$71,595.00-\$107,393.00

Under general direction performs analytical, research, and/or program/project coordination duties and responsibilities with the Inland Regional Energy Network (I-REN) Program, as well as other assigned areas of responsibility. The I-REN Program is on the front lines of promoting energy efficiency in three sectors: public sector building efficiency upgrades, workforce development, and codes & standards training. The San Bernardino Council of Governments (SBCOG) is working with the Western Riverside Council of Governments (WRCOG) and Coachella Valley Association of Governments (CVAG) to implement these programs throughout the Inland Empire. In San Bernardino County this involves working with 24 member cities and the County of San Bernardino to bring energy efficiency improvements especially into disadvantaged communities. The Energy Management Analyst will maintain contacts with many of these jurisdictions in support their energy efficiency efforts.

Education and/or Experience: Equivalent to graduation from an accredited four-year college or university with major coursework in business or public administration, urban planning, environmental science, political science, finance, or a closely related field. At least three (3) years of progressively responsible analytical or administrative experience in a field related to assigned program/area of responsibility or two (2) years of experience equivalent to Management Analyst I at SBCTA.

Requires possession of a valid California Driver's License, a satisfactory driving record, and a properly registered and insured vehicle, to be maintained throughout employment.
